

REPLACEMENT TWO PIECE SPLIT CUP PENDENT ESCUTCHEONS

DESCRIPTION

The 2-pc adjustable sprinkler escutcheon (canopy) has been designed to provide an aesthetically pleasing concealment of the sprinkler piping servicing the individual sprinkler head. The replacement version provides an alternative for replacing previously installed escutcheons that have become damaged or unsightly due to over painting, rust or other environmental contaminants. Use this escutcheon when the fire sprinkler system cannot be shut down or when a system shut down is not preferred. The split cup fits one of four styles of skirts: Standard, Flush, Short Taper and Extra Deep. Available in Chrome or White finish.

There is no reason to drain your system!

Just cut off your unsightly old escutcheon...

...open your new cup...

...and snap it around the sprinkler head, and slide on new skirt.

Installation

Proper installation of the recessed sprinkler escutcheon can be accomplished with tools ordinarily found on the job site. The installer must make sure that the face of the reducing coupling must extend to within 3/4" of the finished ceiling material but no farther than flush with the finished ceiling. Remove the existing sprinkler escutcheon without damaging the sprinkler. Never pry against or use the installed sprinkler for leverage. Place each split cup half around the exposed sprinkler head threads at the same location as the previously installed retainer. Then slide the skirt up onto the cup to hold the cup halves in place. Firmly push the skirt over the retainer until the skirt is firmly seated against the finished ceiling. Installation is now complete. Make sure the final installation meets all sprinkler head manufacturer requirements for recessed sprinklers.
